DJSCE Internship Cell (Dic)

As per AICTE Internship Policy, all the students are required to complete minimum 14 weeks of Internship during their 4 years of Engineering. The DIC in the institute is formed to foster technical competence, build research aptitude and create awareness about professional/industrial environments amongst aspiring technocrats to develop sustainable engineering solutions. Internships are educational and career development opportunities, providing practical experience in a field or discipline. They are structured, short-term supervised placements, often focused on particular tasks or projects with defined time-scales.

Functions of the DIC is to-

- Expose students to the industrial environment, which is challenging to be simulated in the classroom and hence create competent professionals for the industry.
- Provide possible opportunities to learn, understand and sharpen the real-time technical/managerial skills required at the job.
- Provide the students sufficient exposure to the current technological developments relevant to the subject area of training.
- Help the students use the 'Industrial Internship' concepts in their classroom discussions.
- Create conditions conducive to the quest for knowledge and its applicability in the field.
- Help students gain experience in writing technical reports/projects.
- Expose students to various responsibilities and ethical standards.
- Familiarize the students with various materials, processes, products and their applications along with relevant aspects of quality control.
- Promote academic, professional, and/or personal development and channelize the students for future employment opportunities.
