

# Congratulations

DJS Speedsters is the college team of SVKM's D. J. Sanghvi College of Engineering that builds electric superbikes from the ground up.

DJS Speedsters recently participated in the **FMAE Motostudent Season 3** competition held in Coimbatore from 18<sup>th</sup> to 24<sup>th</sup> October 2024, wherein a total of 10 bikes including both electric (7) and combustion (3) category participated from all over India.

The team achieved the following positions in the said competition:

Overall 3<sup>rd</sup> rank in EV category

**Winners:** Autocross and Acceleration categories

**Runner-up:** Endurance and Cost Report

**2<sup>nd</sup> Runner-up:** Design Evaluation

Total 6 events took place: Two in Static and four in Dynamic. Team won four trophies in both events, i.e., One trophy in static event and other three trophies in dynamic event.

This event was a valuable opportunity for our students to gain hands-on experience, face real-world engineering challenges and showcase their skills on a national stage. This competition pushes students to the forefront of automotive engineering, requiring them to design, engineer, and build their own MotoGP motorbikes from scratch.

Hearty congratulations to students as well as the Head of the Department Dr. K.N. Vijayakumar and his team of staff members.
